Education

Arizona State University, Tempe, AZ

Expected Dec 2025

M.S., Data Science, Analytics, and Engineering — Electrical Engineering Concentration

Relevant Coursework: Data Mining, Computing for Data-Driven Optimization, Statistics for Data Analysis, Advanced Database Management Systems, Data Visualization, Mathematical Foundations of Machine Learning

Geethanjali College of Engineering and Technology, Hyderabad, India

July 2018 - Sep 2022

B.Tech., Electrical and Electronics Engineering

Technical Skills

Programming: Python, SQL, R, C, Julia, Scala, MATLAB, Bash

Libraries/Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, PyTorch, NLTK, spaCy, Matplotlib, Seaborn, Plotly, Statsmodels, XGBoost, LightGBM, PySpark, React.js, Flask, Hugging Face

Data Tools & Platforms: GitHub, Tableau, Power BI, Streamlit, Microsoft Azure, Hadoop, Spark, Docker, Snowflake, Kafka, Databricks, Excel (PivotTables, Macros, Advanced Formulas), Google Workspace

ML & AI Skills: LLMs, Generative AI, NLP, Recommendation Systems, MLOps, Feature Engineering

Certifications: Computational Data Science – UpGrad Insofe & Case Western Reserve University (2022); Customer Segmentation Internship – UpGrad INSOFE; Machine Learning I – Columbia+ (2025); LinkedIn Badges (ML, Python, R)

Professional Experience

INSOFE, Machine Learning Engineer

Dec 2022 – Apr 2023

- Developed a no-code NLP platform using Streamlit to enable non-technical users to perform text classification, NER, and sentiment analysis via modular TensorFlow/Keras pipelines with spaCy, NLTK, and regex preprocessing.
- Engineered SQL-backed Tableau dashboards and PowerPoint reports to deliver actionable stakeholder insights, supporting data-driven business decisions and adhering to process improvement standards with robust documentation.

INSOFE, Machine Learning Engineer Intern

May 2022 – Aug 2022

- Led customer segmentation initiatives using scalable Python pipelines and predictive modeling to uncover audience preferences and identify high-value prospects, contributing to data-driven market expansion decisions.
- Designed and implemented highly interactive Tableau dashboards to visualize key performance indicators (KPIs) and streamline insights delivery, directly supporting program effectiveness and data-driven market strategies.

INSOFE, ML Engineer Trainee

Oct 2021 – Oct 2022

- Completed comprehensive end-to-end training in core ML concepts including supervised/unsupervised learning, ensemble methods, CNNs, NLP, and advanced model evaluation techniques with hands-on practical applications.
- Gained hands-on experience designing, building, and deploying scalable, production-grade ML models using PySpark, OpenCV, and Transformer architectures, with robust cloud orchestration via Kubernetes and AWS environments.

Academic Projects

AI-Powered Medical Affairs Insight Generation

- Designed and implemented an agentic data pipeline that ingests and normalizes multi-source pharma intelligence (news, clinical trial registries, social media) into a structured schema indexed by disease area, drug, and sponsor.
- Built NLP components to deliver insights, enabling teams to track HCP perceptions and sentiment trends.

Signal Processing Data Mining for Predictive Maintenance

- Developed a hybrid CNN-LSTM model with 90% precision to accurately predict machine failures, significantly reducing downtime by 30%, supported by advanced noise reduction and multi-scale feature extraction techniques.
- Automated anomaly detection with t-SNE visualization, accelerating predictive maintenance via cloud-based monitoring.

Optimizing Vehicle Routing – Formulation and Methods

- Designed a GPU-accelerated Julia optimization framework using Column Generation, effectively reducing routing computation time by 15% while incorporating complex logistics constraints and dynamic operational variables.
- Validated routing improvements with stochastic benchmarking and metaheuristic analysis for real-time fleet dispatching.

Other Work Experience

Admissions Supervisor (20 hrs/week), Arizona State University, Tempe, AZ

June 2024 – Present

- Supervised and mentored a high-performing team in administrative operations, improving data accuracy by 20% through data-driven workflow automation and compliance management, demonstrating strong project and process improvement capabilities.

Assistant Recorder, Arizona Digital Health Symposium, ASU, Phoenix, AZ

May 2025

- Coordinated event logistics and meticulously documented key insights during multiple breakout sessions; actively supported interdisciplinary collaboration and contributed to comprehensive post-event reporting for strategic planning.
